

**Index to 1880
Mortality Schedule for
Hendricks County, Indiana**

**Indexed by
Meredith Thompson, 2013
Avon, Indiana**

AUTHOR'S NOTES:

Mortality schedules were taken at the time of the 1850, 1860, 1870 and 1880 federal censuses. When recording the information about each household for the census, the enumerator was also to ask about anyone in the household who had died between 1 June and 31 May of the year prior to the census. This information was to be written on a separate record, called the mortality schedule. Because Indiana did not require deaths to be recorded until 1882, the mortality schedules can provide information on some pre-1882 deaths.

The 1880 mortality schedule recorded information on deaths that had occurred between 1 June 1879 and 31 May 1880. There were columns for: name, age, sex, race, marital status, birthplace, father's birthplace, mother's birthplace, occupation, month of death, cause of death, how long a resident and the name of the doctor.

This index does not cover all of the columns of information that were included on the mortality schedule—you should always consult the actual record.

The Indiana State Archives was given the originals of the 1850, 1860, 1870 and 1880 mortality schedules for Indiana; microfilm copies are available at the Indiana State Library in Indianapolis and the Allen County Public Library in Fort Wayne, as well as locally at the Plainfield Public Library. This microfilm can also be ordered through FamilySearch, for viewing at any Family History Center or Family History Affiliate Library.

Last Name	First Name	Age	Sex	Race	Marital Status	Birthplace	Death	Cause of Death	Remarks	Enumeration	Page
[blank]	infant	[blank]	M	W	[blank]	[blank]	Nov 1879	compression brain stillborn		Clay Twp.	105
