

# Theefun Wireless Remote Control Bubble Machine

## Features:

- This bubble machine has to be plugged into an outlet to use.
- Use the included remote control for much convenient bubble generating, or you can generate bubbles manually.
- Suitable for indoor or outdoor use.
- The bubble machine should not be used for more than 8 hours consecutively.
- Performance of the machine may be reduced in low temperatures.

## How to Use

1. Pour bubble liquid (not included) into the liquid reservoir. Note that the type of bubble liquid used can affect how many bubbles are made.
2. Plug the power cord of the bubble machine into a grounded electrical outlet.
3. Start generating bubbles manually or use the wireless remote controller

1). Manually: Switch the power on/off switch to "I" gear to generate bubbles. Switch button to "O" gear to stop bubble generating.

2). Wireless Remote Control: Switch the power on/off switch to " II" gear to activate the remote. Press unlock button of the remote controller to generate bubbles. Press lock button to stop bubble generating.

**\*NOTE:** The "I" gear or " II" gear does not refer to the speed level, this bubble machine only has one speed.

**\*NOTE:** The remote control range is about 15yd/45ft

# Specs

## Specifications

- Voltage: AC 110V/60Hz
- Fluid tank capacity: 1L
- Power: 25W
- Control: manual or remote
